## SUMMARY

---

My fascination with Data Science comes from uncovering patterns and insights hidden within complex datasets. I enjoy applying machine learning, predictive modeling, and pattern recognition, where each project feels like solving a puzzle with real-world impact. Looking ahead, I aim to grow as a Data Scientist who transforms advanced analytics into innovation, driving value across industries such as healthcare, finance, and smart technologies.

**Exploring micro-credential affordances in Bangladeshi higher education** [↗](#)

*Md Taimur Ahad, Faruk Ahmed, Auvick Chandra Bhowmik, Zannatul Maoya Mim, Aunirudra Dey Anu, Peter Busch*

The study explores how micro-credentials can enhance higher education in Bangladesh by lowering costs, offering flexibility, improving job prospects, and making learning more accessible and personalized.

**A customised Vision Transformer for accurate detection and classification of Java Plum leaf disease** [↗](#)

*Auvick Chandra Bhowmik, Md. Taimur Ahad, Yousuf Rayhan Emon, Faruk Ahmed, Bo Song, Yan Li*

The study developed a customized Vision Transformer for detecting and classifying Java Plum leaf diseases, achieving 97.51% accuracy and offering farmers timely, precise disease identification to improve crop health.
